WELCOME YOU

Thank you for becoming a member of 7000 Acres Group. We are a group of individuals who live in and around 30 local villages who are campaigning to save 10,000 acres of food producing farmland. At 7,000 Acres we say yes to putting solar on housing and commercial roof tops along with brownfield land.

We hope that you will join us in having a say on the proposed industrialised solar sites being Cottam Solar, Gate Burton, West Burton and Tillbridge. All 4 come under the National Infrastructure Planning Inspectorate process and they are all in different stages of the planning process. The details of which can be found on our website. It is essential that everyone comments on all 4 sites.

If you need any help in making comments or Relevant Representations on these proposals please don't hesitate to ask us! We will communicate with you via email from time to time to update you on important dates regarding the planning process and to make you aware of anything we feel you need to know. We also put important updates on Facebook.

It is vital throughout the process that we make aware and engage members of our community so they are fully up to speed with what is happening and have an understanding of the size and scale of these proposed projects. You play a very important part in this engagement by making your family, friends and associates enlightened about what is happening so they can also have a say!

If you can introduce more people to our community group it helps us spread the word and they in turn will speak to more friends and family. Please also follow our Facebook page 7000 Acres Group.

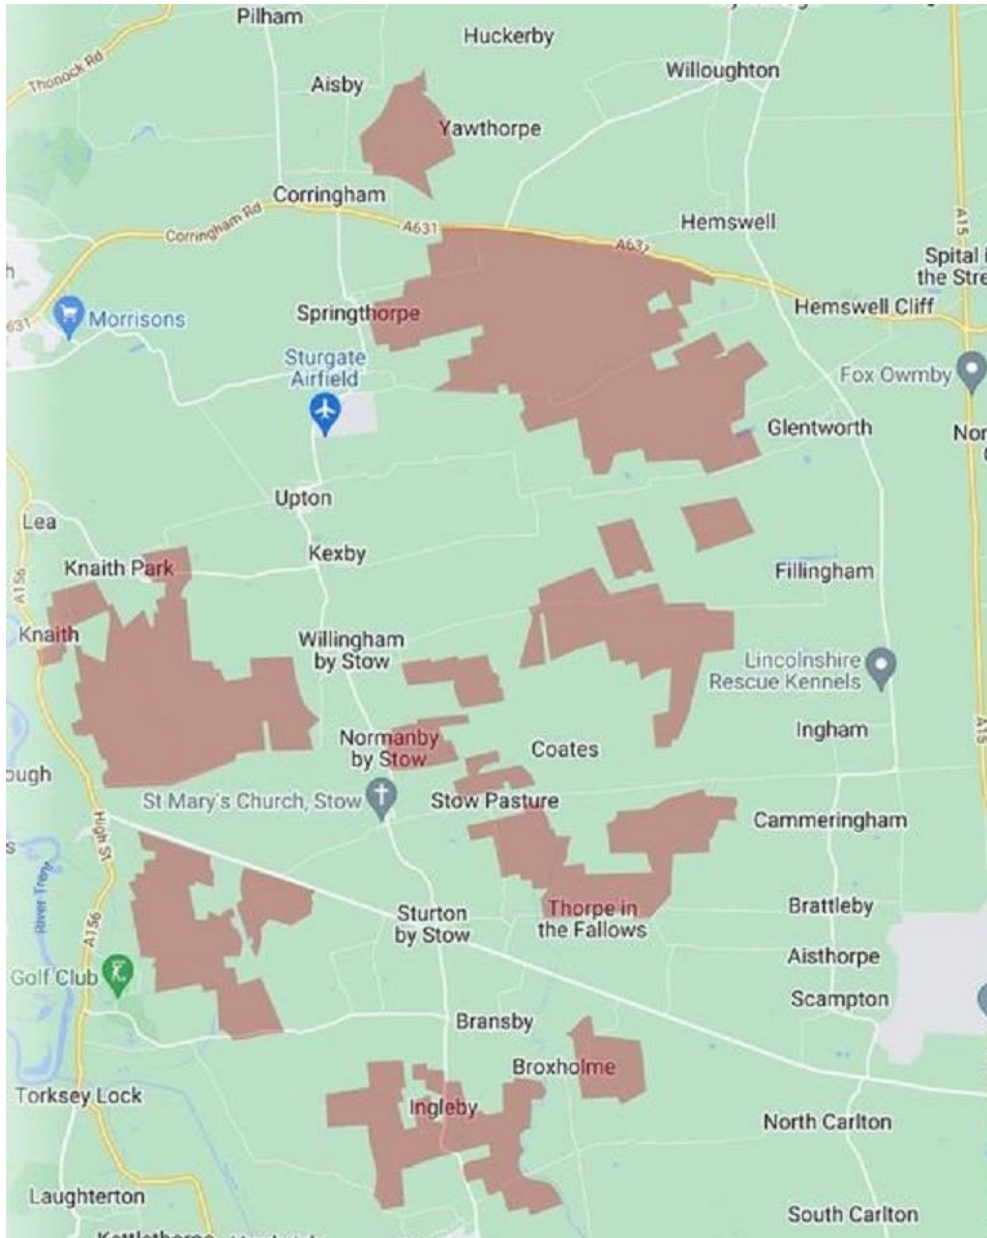

You can also engage with your parish council regarding what they are doing and lobby your local MP to let them know your thoughts and concerns.

You will find among the documents that were in the link we have emailed, a leaflet and a poster which you can if you wish print off and display in your home window or any local community board where you have permission to do so. There is also a member registration form which we would be most grateful if you could complete and email back just so we have relevant information regarding our members.

We are also trying to raise funds to help fund all the necessary activities of the group and to facilitate this we have a GoFundMe page and any contribution would be greatly received: - <https://www.gofundme.com/f/7000-acres>

To keep everyone up to date and to get our members thoughts and ideas we come together once a month holding a meeting at a venue in our community villages and we very much hope to see you there. We will email you the details of where & when prior – see you soon!
